Smart Phone Handheld Signal Jammer Low Power Consumption With 1PCS Omni Antennas

2021/04/01

Product Name: Handheld Signal Jammer Dimensions: 97\*48\*18mm Net Weight: 0.24kgs Antennas: 1pcs Omni Antennas Mini Portable , Handheld Jammer Blocking GPS/GSM/CDMA/4G/WiFi , GPS Signal Jammer Product Instructions: Mobile phone signal screening device (also known as portable mobile phone jammer / separator / suppressor / truncator / isolator / conference information security machine) is our factory adopts advanced foreign technology. Aimed at small venues which are mainly aimed at the safety and confidentiality of some special needs at home and abroad, such as private bosses, confidential offices, negotiation rooms, mobile vehicles, mobile political and business dignitaries, etc., According to the actual situation of domestic and foreign mobile communication, it can block GSM / CDMA / DCS / PHS / 3G / GPS / WiFi within a radius of 5-15 meters (usually about 5-100 square meters). Bluetooth / wireless network and other signals, so that the mobile phone in the area can not play and answer, and will not interfere with other electronic devices in the environment. When the phone is away from the range of shielding, you can return to normal use. To give you a safe, but also a clean. Product Fetures: Blocking GSM / CDMA / DCS / PHSN 3G / GPS / WiFi Bluetooth / Wireless Network options Alloy wire drawing shell, the surface of the most advanced oxidation treatment, there are a variety of colors to choose from Total transmitting power 1.2 W Adjustable effective shielding distance of 5-15m (debugged according to customer's requirements before leaving factory) Easy to carry, small size, light weight, Operating time up to 2-3 hours, easy to charge Low power consumption, no harm to human body and environmental protection Product Applications: Small sites with special needs that are safe and confidential Private boss's office, confidential office, negotiation room Mobile vehicles, mobile political and business dignitaries guarding the scene Various small or temporary meeting rooms for party and government organs and enterprises Personal or business special needs Product Specification: CDMA / GSM frequency 860-970 MHz DCS / PHS frequency 1805-1990 MHz 3G transmission frequency 2110-2170 MHz GPS frequency 1500-1600MHz WiFi / wireless network Bluetooth frequency 2400-2500MHz TD-

CDMA 2010-2025MHz Shielding radius 5-15m (depending on the status of the mobile operator network) Charge power supply AC110-250V/DC12-36V Built-in battery 3.7V 1500mAh Power consumption 0.5 W/h Weight 100g Size 97(L)\*48(W)\*18(H) mm Functional 139 / 138 / 137 / 136 / 135 / 131 / 130 / 130 / PHS / 3G / WIFI / GPS, etc.

Product Image: FAQ: Why is there still a signal on the phone's signal indicator when it works? A: It's just an illusion. In fact, the mobile phone has been unable to communicate. When you press the pull button, you will find that there is no signal on the signal indicator. The cell phone signal shield will not interfere with the normal work of other electronic devices. The antenna should be installed on the corresponding signs of each channel on the host, and then connected to the host power supply. The effective coverage of the shield is a circular area centered around the shield, so be careful to choose the location of the shield so as to avoid blocking the dead Angle? A: No. This is because the electromagnetic signal emitted by the cell phone's signal shield is completely within the country's mobile operating band, which only blocks mobile communication. And this signal is always in a relatively static state, and will not affect any electronic equipment. Are cell phone signal Jammer harmful to people and mobile phones? A: Please rest assured that the electromagnetic signal intensity emitted by the cell phone signal Jammer is very weak. The test data indicates that this signal strength is far from harmful to the human body. At the same time, the mobile phone signal shield is just blocking the forward signal of the phone, so that the cell phone cannot be connected with the base station, so there will be no damage to the phone itself. Is there any difference between the effective shielding distance of the mobile phone signal shield in indoor and outdoor use? A: There are. The effective shielding distance (30-40 meters) of the cell phone signal shield is generally referred to as indoor distance. In open areas, the effective distance of shielding can be several hundred meters. It should be noted, whether they are within the room, or in outdoor use, effective shielding effect of shielding distance has relationship with environmental conditions, such as from the base station near and far, placed, etc. Therefore, when using cell phone signal shield, this factor should be fully taken into account to avoid blocking the dead Angle and thus affect the shielding effect. Is the cellular signal shield the same for GSM mobile phones and CDMA mobile phones? A: that's a good question. Because CDMA mobile phone's anti-interference performance is far superior to that of GSM mobile phone, the effective shielding distance for CDMA mobile phone is smaller than that of GSM mobile phone, but the difference is not very large, about 2-4 meters. But it also reminds users to pay attention to some particularly important sites, and should increase the number of mobile phone signal blockers when necessary to ensure the shielding effect of CDMA mobile phones. After working for a period of time, the mobile phone signal mask is hot. Will working long hours damage the machine? A: thank you for your care. This is a normal phenomenon. In the design, we use the thermal conductivity of aluminum alloy to assist the heat dissipation. This can guarantee long time stable work. As a result, the machine will not damage the machine.
